

# Training Water Leaders. Transforming Water Systems.

Change happens when we equip the right people with the right tools. At Global Water Center, we equip water professionals with the **skills to keep systems running and communities thriving**. Our training courses have **reached over 4,000 people**, and we've developed an **accredited water operator training program** in Ghana with plans to expand across Africa. Together, we're creating lasting solutions through practical, adaptable training.

## Our training is built on a proven methodology

We provide governments, nonprofits, and other implementers with training, tools, and ongoing technical support, including:

- **Courses rooted in adult learning principles** —interactive, immersive, and grounded in real-world scenarios to help learners apply skills immediately.
- **A focus on practical application** — emphasizing job-relevant competencies over theory.
- **Support that extends beyond the classroom** —offering ongoing mentorship, tools, and access to an AI chatbot after course completion.
- **Collaboration with subject matter experts** — ensuring our training reflects best practices and meets diverse needs.

## Current and Upcoming Courses

Courses are available online, in-person, or hybrid. Our goal is to offer each course in English, Spanish, and French.

### Available Now

- **Solar Powered Water Systems (SPWS): An Overview of Principles and Practice** – Learn when and where SPWS makes sense, using the Technology Applicability Framework
- **Designing Solar Powered Water Systems** – Use a step-by-step design tool to build high-performing systems that meet international standards

### Coming in 2025

- **SPWS: Operations & Maintenance**
- **Introduction to Management of Groundwater Resources and Borehole Drilling**
- **Professionalization of Borehole Drilling Supervision**
- **Supply Chain Management for Rural Water Systems**
- **Risk Based Water Quality Monitoring**

We can also utilize lessons from our vocational training program for water operators to create tailored learning experiences.

## Custom Training Solutions

Global Water Center partners with **government agencies, nonprofits, and implementing organizations** to deliver customized training that drives real-world impact.

We'll work with you to adapt existing courses or co-create new ones that align with your mission, audience, and goals. Our training is practical, accessible, and designed to build the skills your team needs to succeed.

**Together, we can strengthen your team's capacity to deliver sustainable water services where they're needed most.**
